80a & 50a STANDARD WIRING DIAGRAM - ONE MOTOR TO ONE SWITCH Dwg. No. V90000

Standard wiring diagram for the connection of ONE motor to ONE switch. Please follow connection details closely as incorrect wiring voids motor warranty. To ensure plugs remain weather resistant check all grommets + seals are fitted correctly and use circular cable or flex only. Motors are 230VAC±10% and draw between 70-215W. **VERY IMPORTANT NOTE: Motors must not be wired in parallel under any circumstances.**
